Hiring Manager
Dubai Business Associate Programme
Dubai, UAE

Subject: Application for Dubai Business Associate Programme

Dear Sir

I am excited to apply for the Dubai Business Associate Programme, as it offers a unique opportunity to bridge my expertise in data science, AI, and problem-solving with business innovation and strategy. With a background in computer science and mathematics, I bring strong analytical skills, adaptability, and a passion for leveraging technology to drive impactful solutions.

I'm pursuing Master of Computer Applications (MCA) from IGNOU and I hold MSc in Mathematics from Farook College, equipping me with a solid foundation in logical reasoning and quantitative analysis. Professionally, I have worked as a Prompt Engineer at Green Rider Technology, refining AI models, and as an AI Development Intern at IPSR Solutions Ltd, where I integrated LLM models into business applications to enhance user experience.

My projects demonstrate my ability to solve real-world problems through technology. I have developed an NLP-based summary quality analysis model, built an e-commerce platform (Lapkart) using Django, and created a house price prediction system using machine learning. These experiences have strengthened my problem-solving abilities and my capacity to deliver data-driven business insights.

The Dubai Business Associate Programme aligns perfectly with my aspirations, combining strategic consulting, leadership development, and innovation. My proficiency in Python, SQL, and data visualization, along with my ability to work collaboratively in diverse environments, makes me a strong candidate for this dynamic programme.

I am eager to bring my technical expertise, analytical mindset, and adaptability to the Dubai Business Associate Programme. I look forward to the opportunity to discuss how my skills can contribute to the programme's success. Thank you for your time and consideration.

Sincerely,
Sahla V
